

Sizing sawblades

Tool solutions for table and sizing sawblades

Your benefits at a glance

- Finish-cut quality without reprocessing
- Processing of a variety of material
- Frequently regrindable

Leitz sizing sawblades – Tool solutions for table and sizing sawblades

New development of all sizing sawblades to increase the efficiency and processing quality.

Standard circular sawblades (tooth shape WZ or FZ/TR) for multi-purpose application (in Leitz Premium design).

Special circular sawblades for special customer demands (in Leitz Excellent design):

- WhisperCut
- Katana
- BrillianceCut
- Circular sawblades HZ/DZ

Your benefit through increased productivity

- Finish-cut quality without reprocessing
- Longer lifetime and perfect cutting results due to reduced vibrations

Your benefit through increased flexibility

- Processing a variety of different material such as coated chip-board, solid wood sheets, gluelam, plastic- and light weight sheets
- Useable on all table and sizing sawblades

Your benefit through increased sustainability

- Frequently regrindable / after reprocessing through the Leitz Service, tool is as new
- High noise reduction through optimized quiet running and stability (e. g. WhisperCut: particularly designed circular sawblade to reduce the noise level)
